

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1(original). An adhesive brassiere, comprising:
a first bulk structure made of an adhesive silicone composition;
an outer film covering an outer surface of the first bulk structure; and
a second bulk structure formed in the first bulk structure made of the adhesive silicone composition,
wherein, the first bulk structure is of a woman's breast-like shape with its inside being hollowed like a bowl, the outer film adheres to the outer surface of the first bulk structure, and the second bulk structure is made of a material with a lower specific gravity than the adhesive silicone compositions constituting the first bulk structure.

2(original). An adhesive brassiere, comprising:
a first bulk structure made of an adhesive silicone composition; and
an outer film covering an outer surface of the first bulk structure,
wherein, the first bulk structure is of a woman's breast-like shape with its inside being hollowed like a bowl, and the outer film adheres to the outer surface of the first bulk structure.

3(currently amended). The adhesive brassiere as set forth in claim 1 [[or 2]], wherein an antibiotic deodorant is applied on at least a portion of a rear side of the first bulk structure.

4(currently amended). An adhesive brassiere, comprising:
a pair of brassiere cups constituting the adhesive brassiere of claim 1 [[or 2]]; and
links provided at the brassiere cups,

wherein, the links are coupled with each other to connect the brassiere cups to each other.

5(original). A method of producing an adhesive brassiere, comprising:
molding an outer film;
placing the molded outer film in a mold for molding brassiere cups;
pouring an adhesive silicone in the mold in which the outer film is placed;
molding the adhesive silicone into a predetermined shape; and
hardening the adhesive silicone.

6(new). The adhesive brassiere as set forth in claim 2, wherein an antibiotic deodorant is applied on at least a portion of a rear side of the first bulk structure.

7(new). An adhesive brassiere, comprising:
a pair of brassiere cups constituting the adhesive brassiere of claim 2; and
links provided at the brassiere cups,
wherein, the links are coupled with each other to connect the brassiere cups to each other.
